

“Academic Esports: A Gateway to Student Credentials/Certifications”

Channel your students' passion for gaming into career opportunities

Jill Ranucci, Ph.D

Esports Area of Interest lead (ETED Division)

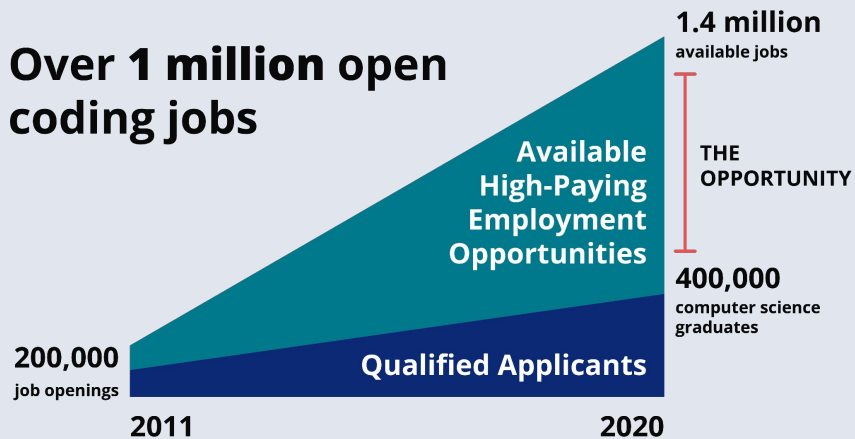

April 13, 2023

Questions:

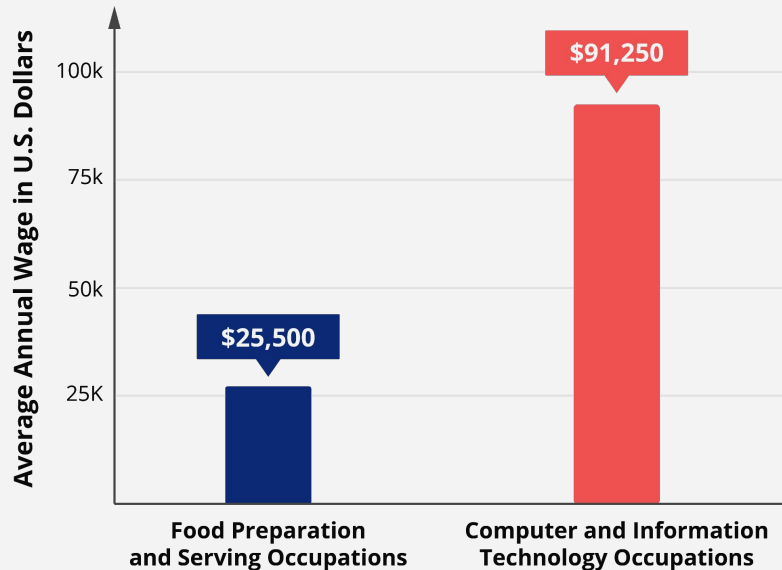

- How do you provide an equitable standards-based technology curriculum that engages students?
- **How do students transition from “gaming” to “mastering” emerging technologies that are high-wage and in-demand?**
- How can CTE support this transition with valuable industry credentials/certifications?

A Talent Shortage

Over 1 million open coding jobs

A Wage Disparity

The Problem Acknowledged

IT Skills Gap

- Over **80% of IT managers** say they have been struggling to hire the right candidate in the past 12 months - according to CompTIA

Slow Recruitment Processes

- The average timeline to hire an IT Professional:
3-Months

Credentials Don't Measure Real Skills

- Majority of coding credentials are knowledge-based, not skills based.

According to Pew Research, roughly nine-in-ten boys (92%) and eight-in-ten girls (83%) own or have access to a game console at home... and 97% of teen boys say they play video games in some form or another.

Pathway Esports = Pathway to Success

Pathway Esports = Pathway to Success

Ysleta ISD first in El
Paso area to include
eSports in Curriculum

Current Landscape

- Billions of kids and adults are gaming!
- **Students do not recognize the power behind their games!**
- Middle and High Schools are beginning to recognize the college/career benefits of Academic Esports...but schools do not know how to start, run, and manage an Esports program, much less harness the power of emerging technologies!

Channel your students' passion for gaming and technology into career opportunities.

Passion

Play the games

Curiosity

Explore their design

Education

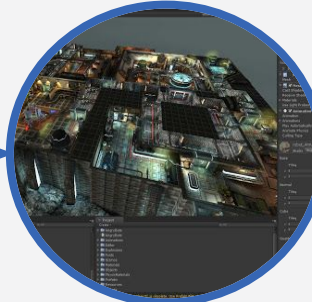

Learn new skills

Certification

Earn an accreditation

Careers

Attain the job

Benefits of Academic Esports

GAMING CAN BE A GATEWAY TO...

COMPUTER SCIENCE/STEM CAREERS

- Every game being played in the Esports universe was built with code... learning to program is “the next step”

COLLEGE SCHOLARSHIPS

- Over 300 universities now offer Esports scholarships

FOSTERING DIVERSITY, EQUITY AND INCLUSION ON CAMPUS

- Students traditionally disenfranchised by other campus sports teams can now have a team of their own as well as academic courses that embed emerging technology skills and certifications.

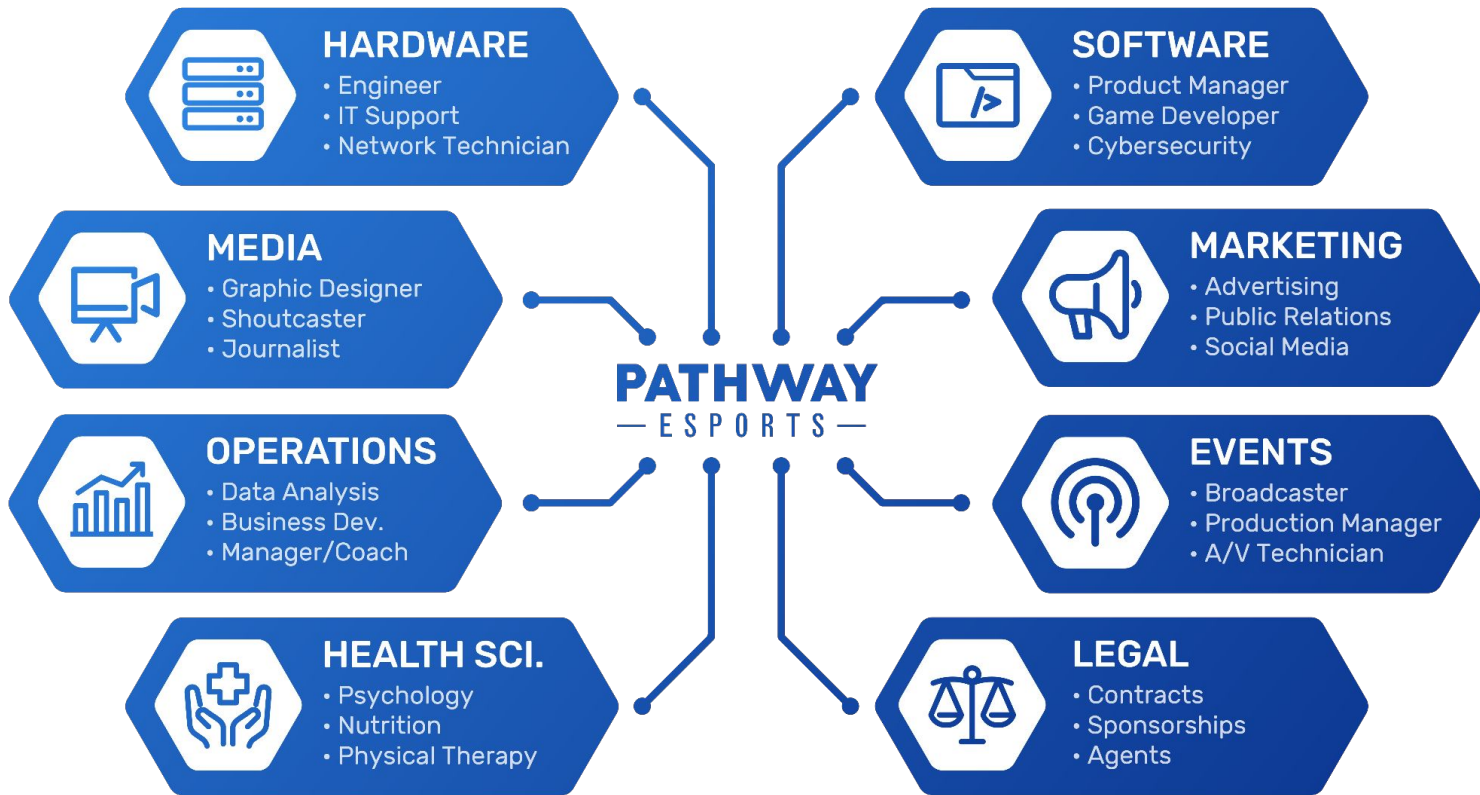

Over 90% of computer scientists and engineers began their careers by playing video games

Esports players overwhelmingly prefer STEM studies.

CAREERS IN ESPORTS

TURN YOUR GAMERS INTO MAKERS

Benefits of Game Development

Project Portfolio

Browser-based games will be hosted on a platform such as Mastery Coding or others and serve as a career portfolio for future employers.

Topics: Object Oriented JavaScript Programming, Computational Thinking

Design Portfolio

Apply concepts for game and asset design and use industry-standard workflows to create game narratives and resources.

Topics: 2D Graphic Design, Color Theory, Narrative Design, Asset Design, Level Design

STEM Connections

Explore imaginative and original ideas while learning STEM disciplines and utilize those cross-disciplinary skills for current and future courses.

Topics: Computational mathematics, Problem Solving, Critical Thinking, Project Planning

Game Development with Unity

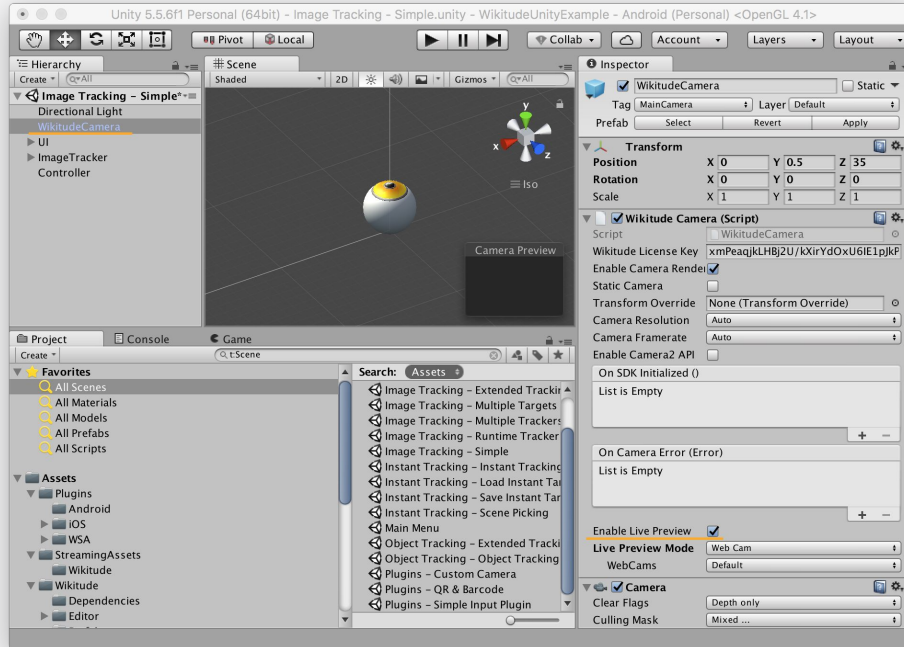

3D Models

Audio

Images

Design Portfolio

Code

Unity is a real-time 3D development platform.

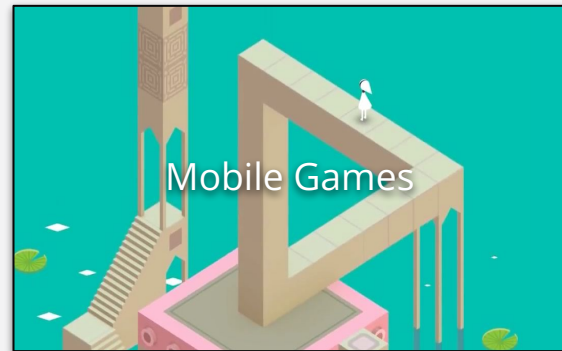

Used to create

- 3D games
- Visualizations
- Simulations
- Mobile Applications
- Virtual Reality Experiences

- 3 billion unique downloads of Unity apps per month
- 53% of top 1,000 free mobile games
- 510% increase in jobs from in recent years

Made With Unity

Unity in the workforce

Unity programmers are hired by a variety of industries across the globe including:

Engineering

Healthcare

Film

Architecture

Games

Construction

& More

Some of Unity's partners include Microsoft, Google, Facebook, Oculus, Magic Leap, Sony, and more.

Fast-Paced Growth of Unity Developers

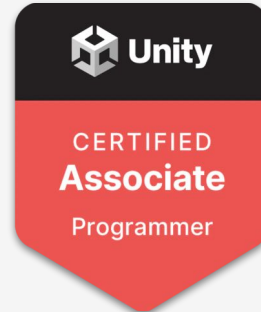

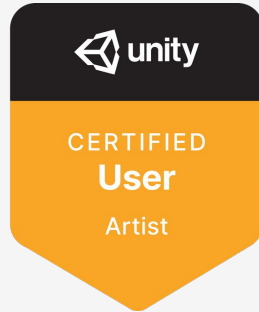

Integrating Math in a Game

- **AND/OR Logical Operators**
- **Building Functions**
- **Randomization**
- **Collision Detection (Pythagorean)**
- **3D Perspective Mapping**

Coding Leads to Certification/Credentials

Equip your students with technology-driven skills for college and careers.
